## SKILLS

HTML

CSS

JavaScript

ReactJs

Java

C++

C

Php

Python

SQL

Bootstrap

## PERSONAL PROJECTS

HosteliO (01/2022 - 02/2022)

- We made this application so that we can provide it to various colleges, who can in turn use it for the hostel allocation purpose for their students.
- <https://github.com/RajAdwaita/HOSTELio>

Speech Emotion Recognition (10/2021 - 01/2022)

- Prepared a speech Emotion Recognition application.
- The project was implemented dynamically and the model gave an accuracy of 84%.
- [https://github.com/RajAdwaita/Speech\\_Emotion\\_Recognition](https://github.com/RajAdwaita/Speech_Emotion_Recognition)

Encrypto (03/2022 - Present)

- nCrypto, a one-stop solution for all your crypto trades. nCrypto is not just any trading platform that helps you to see cryptocurrency prices. But it is one of the very first platforms, that analyses cryptocurrencies for you, and gives you automated suggestions on the future prices of these cryptocurrencies. And these prices are not "On air talks".
- <https://ncrypto100.netlify.app/>

ChooseLyf (10/2021 - 11/2021)

- A web-based management system is required to gather blood donors and connect them with the needy people who have high requirements for a particular blood type.
- <https://github.com/RajAdwaita/ChooseLyf>
